Nationality, argues Peter Hall, did not follow directly from the colonists declaration of independence from England, nor from the political union of the states under the Constitution of 1789. It was, rather, the product of organizations which socialized individuals to a national outlook. In the first part the social and economic development of the American colonies is considered. In New England, population growth led to the breakdown of community - and the migration of people to both the cities and the frontier. With Jefferson's triumph in 1800, these institutions turned to new means of engineering consent, evangelical religion, moral reform, and education. The third part of this volume examines the fruition of these corporatist efforts. The author looks at the Civil War as a problem in large-scale organization, and the pre- and post-war emergence of a national administrative elite and national institutions of business and culture. Hall concludes with an evaluation of the organizational components of nationality and a consideration of the precedent that the past sets for the creation of internationality. This item ships...
