

# Organizational Sustainability

By Turan, Fikret Korhan

Book Condition: New. Publisher/Verlag: VDM Verlag Dr. Müller | A Quantitative Decision Model Towards Maximizing Organizational Sustainability | The sustainability of an organization depends not only upon its financial performance, but also upon its environmental and social performance requiring the integration of economic, environmental and social objectives i.e., the triple bottom line (TBL) into overall strategic plan and decision making process. This research introduces a new decision making tool that integrates both financial and nonfinancial performance measures into the process of investment planning via the TBL. It makes use of stakeholder theory for group decision making, analytic network process (ANP) as a decision support tool and stochastic linear programming to create an optimal investment portfolio. This new tool evaluates and prioritizes a set of projects and creates a long-term balanced investment portfolio based upon the perspectives and priorities of the stakeholder groups and decision makers. It can assist decision makers with developing and making proactive decisions which support the strategy of their organization with respect to economic, environmental and social issues, ensuring the sustainability of their organization in the future. | Format: Paperback | Language/Sprache: english | 330 gr | 240 pp.

## Reviews

*A very amazing publication with perfect and lucid information. We have read through and that i am certain that i will planning to study once more yet again in the future. You will not really feel monotony at anytime of the time (that's what catalogues are for about should you question me).*

-- **Matilda Hoeger V**

*Completely essential go through ebook. It can be writter in basic phrases and never difficult to understand. It is extremely difficult to leave it before concluding, once you begin to read the book.*
