One hundred and fifty crocodile feet long and serving a wholesome selection of vines and grubs, the Silver Albatross is a little unique, and today is her maiden flight. From the recycled materials used in her construction to the half hound, half penguin crew that man her, this metallic bird is a major breakthrough for endangered animals everywhere. The passengers are a little unique too. The dieting hippopotamus, the modelling chameleon, and the poker-playing cat pack all hope to realise one unified dream: to finally level the playing field humankind has created in its continuous encroachment of their habitat. But where animals are concerned, things aren t always plane sailing. And that mysterious crate at the back of the plane is prepared to throw everything off course.
