Createspace, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.IN his monograph on Congested Prices, Mr. Scudder evidently uses the word congested as meaning artificial or abnormal; and his work is principally an inquiry into the causes of the fluctuation of prices, with especial reference to the causes of commercial panics. He recognizes at the outset the occult and subtle nature of his subject, and propounds his views tentatively and with caution. Without attempting anything like a complete solution of the problem, or the formulating of distinct means by which the recurrence of panics may be anticipated or averted, he has stated concisely some very important factors in the solution, and made an interesting contribution to the discussion of the complex elements which the problem involves. An important step is taken in the distinctness with which he recognizes the purely mental element in the formation of prices. The Boomtown described by a recent clever writer in the Atlantic Monthly, who, seeing no market for his town lots when offered at cost, doubled the figures and found eager purchasers who argued that property rising so rapidly must be a desirable investment, gave a practical illustration of the power of this mental element, which is a very direct and potent factor in the prices of real estate and other speculative values. There might have been a gain in clearness, however, had Mr. Scudder excluded more definitely the class of prices with which quite another law obtains-the law of comparative or substitutional values. Species of property that have a natural value closely determined by their relation with each other and their comparative desirability for the same general purposes, seem substantially to exclude the mental factor, except in cases of artificial...
