PRODROMUS OF THE ZOOLOGY OF VICTORIA, VOL. 2: OR FIGURES AND DESCRIPTIONS OF THE LIVING SPECIES OF ALL CLASSES OF THE VICTORIAN INDIGENOUS ANIMALS (CLASSIC REPRINT) (PAPERBACK)

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Prodromus of the Zoology of Victoria, Vol. 2: Or Figures and Descriptions of the Living Species of All Classes of the Victorian Indigenous Animals This eleventh Decade gives illustrations in the first plate, No. 101, of the only Victorian specimen known of the great Luth, or Leathery Turtle, the largest of the living Chelonians, and certainly identical with the Old World and American examples. The second plate, 102, gives the first recognisable figure of one of the most extraordinary of Australian Lizards, the Rugged Stump-tail, or Shingle-back, Lizard; the short head-like tail, and very large, thick, rugged scales of which suggest two of the popular names given to it. The next plate, 103, shows one of what I venture to call our Worm-Snakes, the Typhlops nigrescens, which burrows in the light soils of the warm northern part of the colony, and is often found in ants nests. The fourth plate, 104, is of great interest, not only as giving the first accurate figure of the most famous of all Sharks, the Basking Shark, the largest of all known fishes (upwards of thirty feet long), but as representing the only recorded occurrence of the species south of the Equator. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy.
