Excerpt: . . . lengthy text messages using the Extended Message Service (EMS), while a high-end phone typically supports the Multimedia Message Service (MMS) to exchange sounds, color images, and text. Similarly, the ability to chat online directly with another user may be unsupported, supported through a dedicated SMS channel, or supported with a full Instant Messaging (IM) client. High-end phones typically support full function email and Web clients that respectively use Post Office Protocol (POP) Internet Message Access Protocol (IMAP) Simple Mail Transfer Protocol (SMTP) and HTTP, while advanced phones provide those services via Wireless Application Protocol (WAP), and basic phones do not include any support. Figure 2 gives an overview of the capabilities usually associated with each class of phone. Figure 2: Phone Software Components Most basic and many advanced phones rely on proprietary real-time operating systems developed by the manufacturer. Commercially embedded operating systems...
